

AlohaCare's Quality Improvement Incentive Program

In February, AlohaCare released our Quality Improvement Incentive Program. All primary care providers who serve as PCP for at least one member eligible for incentivized services received a program packet. The program packet included a cover letter, a member-level list for each incentive measure, a measure education worksheet, and a participation acknowledgement form.

The program incentivizes the following HEDIS measures:

- Childhood Immunization (Combo 2)
- Frequency of Prenatal Care
- Timeliness of Prenatal Care
- Controlling High Blood Pressure
- Comprehensive Diabetes Care (four components)

This incentive program will cover a three year span, from 2015 to 2017. The first year (2015) will serve as the baseline year for which providers will be incentivized \$10 per compliant member per measure. The following years (2016 and 2017), each provider will be incentivized based their relative year-to-year improvement compared to their 2015 baseline outcomes.

Provider Report Cards will be distributed in August 2015 and November 2015. Final reports will be distributed with incentive checks in May 2016.

Questions about this quality incentive program can be directed to:
